ACHIEVEMENTS

Junction 2022 - Second place in TX's Web3 challenge track

- Created a brand campaign marketplace using blockchain tech and Google Cloud Video Intelligence API with the goal to ensure fair pay for content creators based on the performance of their work.

ALHASAN AL-QAYSI

Full-stack Web Developer & Lifelong Learner

I began my programming journey with JavaScript, and my skill set now encompasses Node.js, React, Vue.js, Git, SQL, MongoDB databases, Azure and Google Cloud. JavaScript and its associated frameworks and libraries are my strong suit. As a self-taught developer, I'm well-versed in the evolving digital landscape and eager to be part of it. I'm actively looking for opportunities to further expand my skills and make significant contributions to the world of software development.

EXPERIENCE

Software Developer at Cyberday | Agendum Ltd

2023 - present

- Implemented new features and fixed bugs for cybersecurity compliance management system
- Worked with Vue.js on frontend and Node.js on backend in a micro-service architecture project

Solo and Group Projects

- Adverse Marketplace (for Junction 2022)
- [Personal portfolio website](#)
- Social app that connects bikers to each other (TinBike)
