LANGUAGES

English: Professional

PROJECTS

- **Rebaz Translate API**

Developer

<https://translate.rebaz.dev/api/translate?from=en&to=ku&text=hello>

I made one of the fastest free API translates, anyone can use it

I use Redis with MongoDB to store all translated data to response users with less than 100ms.

- **Bomboto**

The First AI Kurdish in Messenger you can talk with it in more than 102 languages

<https://www.facebook.com/messages/t/106542618161283>

The First AI Kurdish in Messenger you can talk with it in more than 102 languages

- **Botland**

Developer

<http://botlandtranslator.com>

- I was make API to Translate bettween 102 languaugs
- Building Entire Facebook Bot
- Build Talking Session to talk to other nation's people in your mother language
- Building Website To Customer They can see our content and contact us to make advertising
- Build an Automation system to Translate and Replay comments (for example someone writes (Hi) in one of our posts this system will provide auto replay to her or him in Kurdish language or any language

- **Slemani water Website & Admin Panel**

Developer

<https://slemanewater.com/>

I made this website which is used for selling Slemani water Products you can buy items and add your feedback, admin on the admin panel they can use the admin panel section to add (items, videos, awards, Blog posts, galleries, and Coupon codes.

- **Akhawtn chatbot website and messenger chatbot**

Role - Developer

<https://akhawtn.com/>

Akhawtn is a modern website, which as the developer of the whole operation, I used (Next.JS, tailwind) & (Node + express) to complete the project professionally.

this website is made for akhawtn chatbot users so they can buy items and some other services as well.

WORK EXPERIENCE

- **ModeGroup - January 2022 To June 2022**

SoftWare Developer

I was working from modeGroup Company.

I did work with Facebook API and graphQL API and

here is one of the projects i was working on it

<https://www.botolon.com/>
