About

I am a User Experience Designer, Product Designer, and User Researcher with extensive knowledge of Figma, Microsoft office products, and Adobe Photoshop.

I am a hands-on, collaborative, and energetic UX designer, skilled in Grid and Design Systems. I have completed several projects, including the design of an e-commerce dashboard, a design system and two mobile apps.

With my background as a computer engineer, I have intermediate knowledge of web and front-end development. I'm a team player but can also be a quick learner and operate on my own.

I'm pursuing a job that allows me to apply my acquired knowledge to its fullest and to further develop my design and technical skills..

Experience

UX/UI Design Bootcamp — Re:Coded Academy
June 2022 to November 2022
