Flutter and dart
Firebase
pusher , one signal and twilio technologie

IT technician
Server configuration and setup OS(Linux,Windows and MacOS)
Network configuration

MS office
Database Administrator
Computer Skills

Projects

Car Sale System

A comprehensive solution for car dealerships to facilitate the buying and selling of vehicles for their stores.

The Car Sales System is a robust software platform designed to streamline the process of buying and selling cars within a car dealership. This innovative system provides a user-friendly interface and a range of features to enhance efficiency and effectiveness in managing inventory and transactions. With the Car Sales System, car shops can optimize their operations, attract more customers, and maximize sales potential.

Table reservation and ordering system for restaurants

It was my 4-stage project, our efficient solution enables customers to easily reserve tables and place orders using QR codes or provided tablets, aiming to simplify restaurant operations and enhance the customer experience. The system comprises two main components: a reservation management system and a QR code ordering system. With the QR code ordering system, customers can conveniently browse menus, select items, and place orders from their own mobile devices or tablets. Simultaneously, the reservation management system allows customers to reserve tables for specific times. Additionally, the system includes a point-of-sale component that empowers staff to efficiently manage orders and generate receipts. Together, these integrated features optimize restaurant processes, streamline customer interactions, and elevate overall operational efficiency.

Student ID card generator

The Student ID Card Generator is a web-based platform designed to streamline and expedite the process of generating student identification cards. This platform leverages data sourced from the Registration Committee, facilitating a more efficient and swift production of student IDs.

Paitaxt Library

The web-based platform dedicated to the Paitaxt library facilitates seamless interaction with the institute's literary resources. Users of this platform have the capability to peruse the catalog of available books within the library. Additionally, they are provided with the functionality to place orders for the books they wish to read. This online system streamlines the process of accessing and obtaining literary materials, enhancing the overall efficiency and convenience for library users at Paitaxt.

PTI – Private

The PTI-Private application is a comprehensive educational tool specifically developed for Paitaxt Technical Institute. This application has been created and successfully published on Google Play, with imminent availability on the Play Store. PTI-Private serves as an integrated platform, encompassing a myriad of functionalities to enhance the overall educational experience for students.

Users of this application gain access to a variety of features, including but not limited to task management, exam schedules, retrieval of exam and monthly results, navigation through subjects and subject schedules, viewing payment details, staying informed about upcoming events, monitoring attendance, accessing the institute's library, uploading documents to the Registration Committee, providing feedback to teachers, seeking support at any time, and numerous other capabilities. The application aims to provide a centralized and user-friendly interface for students to effectively manage their academic endeavors and engage with various aspects of their educational journey at Paitaxt Technical Institute.

Certificates

Certificate of appreciation

This certificate is presented to [Ibrahim Fayaq Qadir] in recognition of your volunteer service for [The Korean Studies] during the [3rd Korean Festival: The Friend of Korea] event.

Certificate of appreciation

بەناوی سەرۆکایەتی بەشی زانستی کۆمپیوتەر و ئاییتی سوپاس و پێزانینی خۆمان ئاراستەیی
