PROJECTS

Android:

VitRents- A Rental App

•"Architected a sophisticated rental application, seamlessly merging Android development, Java programming, and meticulous UI/UX design. The application facilitates efficient property transactions through its intuitive interface and robust features, elevating the user experience in the rental domain."

Android:

Skyward Voyage: Navigate the White Wings

•"Skyward Voyage a game with dynamic bird navigation, obstacle avoidance, and vibrant visuals for an engaging mobile gaming experience."

Machine Learning

Move Mentors

•"Collaboratively led an 8-member team in developing a real-time sign language interpretation project. Personally contributed to model development, enabling the system to translate gestures into text and audio output through live camera feed, fostering inclusive communication."
