

BAREZ AZAD

FLUTTER DEVELOPER

PROFILE

Born on 18/12/02 (21 yo), native Kurdish residing in Halwer. A graduate of Koya University with a degree in Software Engineering, I consistently ranked among the top 10 students over the course of four years. I am deeply passionate about leveraging my task-oriented approach and strong communication skills to excel in software engineering roles. I am committed to delivering high-quality results and fostering effective collaboration within teams.

EDUCATION

- 12 Years in school
- Bachelor of Software Engineering at Koya University

EXPERIENCE

- In addition to my four-year university education, I've completed four major courses in web development, mastering HTML, CSS, JavaScript, SQL and PHP. Over three years, I've focused on mobile app development with Flutter and Dart, culminating in the creation of three successful applications. These include a recreational app, a graduation project, and a salesperson ordering app for Batam Nuts. My expertise lies in translating technical skills into practical solutions, making me a valuable asset in development roles.
