YUSUF GULMEZ

ELECTRICAL AND ELECTRONIC ENGINEER

ABOUT

Electrical and Electronics Engineer with a background in automation and control engineering, committed to continuous self-improvement. Experienced in mobile application and backend software development. Highly skilled and open to new learning opportunities

SKILLS

- CONTROL ENGINEERING
- AUTOMATION ENGINEERING
- C++
- MOBILE APP DEVELOPMENT
- BACKEND ENGINEERING
- FRONTEND ENGINEERING
- TIA PORTAL
- PLC PROGRAMMING

LANGUAGES

- Turkish (Native)
- English (B2)

EXPERIENCE

INTERN- AUTOMATION AND CONTROL ENGINEER

OLRIC AUTOMATION AND CONTROL
SYSTEMS(06/2023 - 08/2023).

During my internship at Olric Automation and Control Systems, I gained expertise in PLC programming using Siemens TIA Portal, control systems design, and troubleshooting. Collaborated on the development of electrical panels, incorporating components such as contactors, buttons, switches, and asynchronous motors.

EDUCATION

- MERSIN UNIVERSITY

Bachelor of Science in Electrical and Electronic Engineering
2018-2024

PROJECTS

2023 AUTOMATION PROJECT

have developed a project using TIA PORTAL and utilized Factory IO for simulation. The project includes a medium-level factory from the input line to the output line, and the products in this factory are recorded in the database in real-time by the backend server I have set up. This allows users to graphically view the number of product entries, efficiency, and logs

2023 STOK RADAR APP (IOS, ANDROID AND WEB APPLICATION)

I have developed an application that operates on Android, iOS, and web platforms, and I have written both the backend and frontend components myself. The application includes so many features on backend and has around 15 pages on frontend.

2024 TASKIFY NINJA (IOS, ANDROID AND WEB APPPLICATION)

I have created an application for Android, iOS, and web platforms that allows users to create tasks, track them, and utilize Pomodoro timers. I have written both the frontend and backend components of the application myself

CERTIFICATIONS

2022 Hero to Zero Flutter Mobile App Development

2023 Fundamentals of Backend Engineering.

2023 Ai Projects with Python | Machine & Deep Learning.

2024 Mastering Control Systems : Very basics to Advance

2024 Node.js, Express, MongoDB & More: The Complete Bootcamp
