

# Ibrahim Ibrahim

## Network Engineer

I have been developing my skills as a network engineer for more than 3 years, taking courses, participating in workshops and mentorship programs, and by participating and winning in Huawei ICT 2020 competition. I possess valuable skills such as critical thinking and troubleshooting that I believe make me best suited for the position of a Network Engineer.

## ACHIEVEMENTS

### HUAWEI ICT Competition Middle East 2020 National Finals (2020 - 2021)

In the **National finals** I was able to win the first place. **Tasks:** Study & comprehend ICT technologies in a short time. The curriculum was composed of seven topics ( Routing & Switching, Security, WLAN, Cloud, Storage, 5G & AI. Exam was composed of 60 questions in 60 mins. Had to be in top 3 to pass this stage. **Achievements:** I was able to pass this round & win first place.

### HUAWEI ICT Competition Middle East 2020 Regional Finals (2020 - 2021)

In the **Regional finals round**, I was one of the representatives of Iraqi team and competed against 11 Middle Eastern teams. Iraq won second the place & the team is waiting for the final round. **Tasks:** The team had to work together to pass one exam that was composed of 2 parts. In the Lab exam, we were given a topology that was composed of multiple branches & we had to configure the whole topology in 7 hours. Topics included for the lab exam were Routing & Switching, Security & WLAN. Issues were related to VLAN, DHCP, OSPF, IS-IS, BGP, MPLS, GRE Tunnel, IPSec VPN, ...etc. **Achievements:** The team was able to work in harmony and able to finish the topology with a few minor issues. As a result the team won the **second place in Regional finals**. And now the team is waiting to participate in the **Global finals**.
