Skills

- Flutter
- Dart
- RESTful API library (Dio)
- State management (Cubit & Get)
- Sockets
- MySQL
- Git
- Agile
- Figma
- Firebase
- SOLID Principle
- Clean Code
- Clean Architecture
- Java
- Kotlin
- OOP
- Excellent Problem-Solving

Educations

COMPUTER ENGINEERING

University of Baghdad

2018-2022

Profile

I am an experienced mobile developer with a background in native Android development, and I have now transitioned to become a Flutter developer. With over two years of software field experience, I possess strong skills in creating robust and user-friendly applications. I have successfully completed projects using Flutter.

Experience

FLUTTER DEVELOPER JULY 2023 - PRESENT

Lamassu Iraq , Freelancer

As a Flutter developer, my responsibilities encompass the diligent maintenance and optimization of existing applications to ensure optimal functionality and user satisfaction. Simultaneously, I actively engage in the development of new applications, employing advanced techniques to achieve superior performance, scalability, and maintainability.

Projects

ROYAL SCHOOL

- Receive a variety of notifications from the school management, including important announcements and updates.
- Access homework assignments, submit answers.
- Track and oversee student attendance, ensuring parents and teachers stay updated on attendance records and any instances of absence.
- Utilize Google Maps integration to track the real-time location of school buses, ensuring student safety during transportation.
- Facilitate direct communication between teachers, students, and parents through live chat features,
- Create dedicated groups for each class, enabling seamless communication and file-sharing among teachers, students, and parents.
- Enable students to access school installment details and offer teachers quick access to salary information.

Technologies:

- Cubit , Socket, Retrofit, Shared preferences, Firebase
