EDUCATION AND TRAINING

1 Sep 2017–Present

Bachelor of Information Systems Engineering

Syrian Virtual University, (Syria)

The purpose of this <https://www.svuonline.org/en/program/ise> is to prepare professional IT engineers and programmers. The program aims at making them acquire the essential knowledge and skills in computer engineering. They will be working in a well-prepared online environment, in which modern learning methods and tools are available for them. This environment will motivate them to learn how to analyze, synthesize and create innovative IT solutions. The students get all that they need in terms of theoretical and practical knowledge required. Here is a set of the most important learning outcomes of the program:

- Understanding the IT theoretical basics.
- Understanding the engineering basics and methodologies.
- The Knowledge of information system design, implementation, and testing.
- The Knowledge of protecting information systems, data, and networks.
- The Knowledge of IT project management & quality assurance.
