ABOUT ME

I see myself as helpful and reasonably co-operative within groups, although I can also work well individually. I am very enthusiastic in many ways. I don't mind taking risks, however I do consider the consequences before my actions. I usually get totally involved in the things, which are interesting for example, going to the gym and working out effectively to increase my metabolism. I enjoy working with others as I learn a lot by talking things through with them. Also I usually try lots of different ways of doing things for example, revision I use different methods such as viewing educational videos and drawing mind maps etc. I'm active and have lots of energy. I sometimes use my instincts to work things out. I can learn by trial and error, however I like variety and excitement.
