PUBLICATIONS

Tech Blog

I keep a simple tech blog of things that I find useful and things that I need during work.

🔗 blog.hasan.one

I love what I do.

PROJECTS

Bike Router

Modern Web App

An app that helps users plan and analyze a cycling trip. I used React and Typescript and kept things as simple as possible. For state management, I used React context API and props drilling.

Git

Biker Phone

Deployed on Playstore

A mobile application that I made using React Native.

EDUCATION

Ninevah University

Bachelor of Engineering, Electronics Engineering

(November 08, 2010 - July 11, 2017)

Even though war broke out during the course of my education, I managed to graduate with good grades especially in programming-related courses.
