 [Khadija M. Al-Khashab](#)

Proactive, smart, ambitious, adaptable and initiative full stack developer who always seeks for the best quality, accuracy and continuous development in work.

## EXPERIENCE

SEP 2017 – JUN 2021

**SOFTWARE DEVELOPER**, O3 TELECOM | ERBIL – IRAQ

Worked as a full stack developer in the development department in the main Internet Service Provider of FTTH ( Fiber To The Home ) service company in Kurdistan region of Iraq, played an important role within a team of 3 individuals on developing and maintaining company's software projects, with appreciation certificate granted.

My areas of responsibilities I had there were:

- Creating, developing, researching, designing, implementing, and managing company's software programs.
- Testing and evaluating new programs.
- Identifying areas for modification in existing programs and subsequently developing these modifications.
- Developing quality assurance procedures.
- Deploying software tools, processes, and metrics.
- Maintaining and upgrading existing systems.
- Training agents to use new added features to our systems.
- Systems related problems' solver.
- Working closely with other developers, designers, business and systems analysts.
- Writing and implementing efficient code.
- Determining operational practicality.
- Writing important scripts and implement cronjob and scheduled tasks.
- Managing mailing server related with the systems.
- Managing servers, wiring up applications, debugging apps-server issues and solve it.
- Writing efficient MySQL and SQL queries.
- Essential Management assistance for systems users, agents, roles and permissions.
