## Skills

Programming.

UI/UX design.

Graphics design.

Software testing.

Office suite.

## What Can I Do

- With 3 years of experience in the software development field I can design and manage UI/UX And implement the designs with different frontend programming languages and frameworks like Flutter, ReactJS, Android Jetback Compose, SwiftUI and more
- I have a good experience drawing illustrations, icons and different kinds of UI elements using Adobe Illustrator.
- I sketch and design professionally with Figma and Adobe-XD.
- I can draw using canvas and make native animations with coding.

## About Me

As a Handworker, Passionate, and Efficient person, I'm looking forward to push my career ahead towards the UI/UX developer title, and with my previous work experiences I will be a perfect match for this job
