

# Harem Mohammed Smail

## Front-End web developer

harem.m.smail@gmail.com

+964 7506787720

Adala, Erbil

[LinkedIn](#)

[GitHub](#)

*Software Developer in best practice code, building, testing, and maintenance of websites. Good skills in web development programming languages like JavaScript (React.js), Java, also markup languages. HTML5, CSS3 also (Bootstrap), Those were just tools I used for the problem-solving skill which is the primary skill that I'm proud of. Able to effectively self-manage during independent projects.*

## EDUCATION

---

### Erbil Polytechnic University - Erbil B.Eng. Information System Eng.

September 2021 – June 2025

During university I studied Web design and Web development HTML, CSS, Bootstrap, JavaScript, (Objected Oriented Programming with Java), PHP and MySQL, also Studied Statistics, SPSS, Calculus, Adobe (Photoshop & XD) ...

## SKILLS

---

- JavaScript
- React.js
- Java
- GitHub
- CSS
- Bootstrap
- HTML

## WORK EXPERIENCE

---

### Freelancing - Frontend Web Developer

December 2021 – Present

During Studying and learning Software development and especially frontend web development, I continuously have gained knowledge in that field from Courses and Documentations, and also continuedly practicing by writing code, debugging, and creating projects

- Developed React components following best practices such as utilizing hooks and functional components and implementing a clear separation of concerns
- Up to date with react features like the last version of React Router
- Working with asynchronous code and using API and endpoints to fetch, post, put and delete from endpoints
- Utilized provided databases on my projects
- working with JSON date format
- Utilized pure CSS and Bootstrap for designing web pages

## LANGUAGES

---

- **Kurdish** - Native
- **English** - Highly Proficient
- **Arabic** - Limited Working Proficiency

## Courses

---

### **React Tutorial with Mosh** – [Programming with Mosh](#)

March 2023 – Present

React 18 course, Mosh's love for coding and teaching shines through in every video. His friendly and approachable voice makes learning a pleasure.

### **Adobe XD for Beginners** - [The Net Ninja](#)

Feb 2022 – Present

in this tutorial series I have learned how to use Adobe Xd (a UX & design tool) from scratch. It was a beginner level Adobe Xd tutorial but it gave me a good knowledge to design my User Interfaces.

### **React Router in depth** - [The Net Ninja](#)

Jan 2023 – Present

It was a great course of react router V6.8, With this version, React Router has just become a lot more awesome. it gave me a new way to work with react especially working with loaders and actions when fetching data, load data when route to different pages And submitting forms, and much more.

### **Full React tutorial** - [The Net Ninja](#)

August 2022 – Present

This course was my introduction to ReactJS, but I have gained a very good knowledge on react. it was a very good starting with react, after this Course I learned more on react by taking more react courses and reading documentations, to learn more and stay up to date with react and react features.

### **Asynchronous programming with JavaScript** - [The Net Ninja](#)

July 2022 – Present

With this great course I learned how Async code work on browser, Working with API endpoints, fetch post, put and delete from endpoints, handling errors during fetching the data, and working with JSON date format

### **Gateway of Programming with JavaScript**- [Wane](#)

December 2021 – Present

This was a very good Course as a Gateway for programming and starting JavaScript, during my course of study, I made sure to practice coding to the best of my ability.

## Licenses

---

### Intro to Data- Re:Coded – [Re:Coded](#)

June 2023 – Present

Intro to Data course, was about Learning: skills to analyze and interpret data, summarizing data, critical thinking with data and visualizing data

## Projects

---

### Dental Clinic Software

Nov 2023

I developed a web-based software system for Sadaf Dental Clinic to streamline their operations and improve efficiency. This application serves as a comprehensive tool for managing patient data, encompassing personal information, payments, appointments, and more.

### Movie Website – React

May 2023

One of my personal projects is a movie website where, as a frontend developer, I utilized a provided database. Users of my website have access to all of titles, search for movies by title, genre. It also features a user-friendly interface that makes it easy to find and watch movies. For the development of this project, I employed React.js.

The website is live at <https://hmovies12.netlify.app>
