Experience

New Standard

Laborer/Inspector

Worked as a truck/vehicle inspector at the Zakho customs.

My job was to make sure nothing illegal enters the borders of the Kurdistan region.

I was also responsible for taking out samples from the trucks that was caring cosmetic products, cleaning products and inhaling products to the inspection area.

As an IT support specialist, I had to work on two types of computers, one of them was for entering vehicle and driver data, general data about the product and its destination, the second computer was for entering samples data.

My shift was every two days, one day for (24hrs).

Programs that I worked on were (Excel, C# and Word).

July 2017 - August 2017 (2 months)

Experience

UNICEF project

Volunteering for UNICEF project

UNICEF gave us a training for three days, the first day was about helping and giving with what you have and our instructor talked about 'mother Teresa' and how she helped people in India.

The second day was about leadership and team work, also how to be motivated, trust your friend, solve problems and (ego, alter ego and superego).

The final day was about Kurdistan problems and what we want as future generation.

After the training they gave us certificates.

And they told us to give lessons to an education center so a group of us went to 'Rand Private Institute' and gave its students lessons about leadership, trust, friendship, parenting.... etc.
