EXPERIENCE

February 2017
Desktop Application

I developed desktop applications including (local database desktop app, simple games, custom data management apps, custom tools for ease, ...etc).

I mostly used these languages for them (C#, VB, Java, Python, ...etc).

April 2019
Programming Challenges and A.I

I like solving programming challenges, and I participated in some problem solving challenges including Hackathuly 2019, Google online challenges, and some others.
And also I like data management and A.I and machine learning fields, I worked in these areas specifically in image processing ad vision.

June 2018
Mobile Application

I developed mobile applications for Android and iOS, using Java for Android, and Xamarin for iOS or both, and I also used Unity for creating games for mobile devices, I developed (offline mobile apps, online mobile apps, mobile games).

February 2020
Automation Scripts

I have created a lot of automation tools for myself and also for others, I like programming with python3 and making my life easier with portable python scripts, no matter offline jobs or online, I usually use Python3 or NodeJS for making Automation Scripts.
