PROFILE:

A passionate software engineer who worked on a variety of projects with a diversity of technologies and requirements, from ERP systems to task management solutions I have acquired a very broad experience about the software industry and especially the C# and JavaScript world. Usually, I work on the back-end side of a system, also when things coms to the front-end side I have great skills at designing beautiful websites while maintaining a very good UX. I am also interested in exploring the DevOps world and its ecosystem.
