Summary

A dedicated and professional **senior software engineer** with over 9 years of experience in software development, specializing in crafting robust web applications. Proven track record in SaaS, the principles of clean coding and staying abreast of industry trends. Adept at Server Management, Laravel, Vue.js, Microservices, Nginx, MySQL, Ubuntu, Git, and Cloud Serverless. Effective leader who performs well in collaborative environment with stake holders, colleagues and team members. Seeking to work in an environment that is conducive to my intellectual, professional, and personal growth, where I can contribute significantly to the growth of the team/organization with strong experience and expertise leading to success.

Experience

Senior Software Engineer – 09/2023 to Present
Wealth Preservation Holding Company, LLC, Kingdom of Saudi Arabia **(remote)**
- Migrate infrastructure from non-serverless to serverless, resulting in a 400% reduction in AWS costs and decreased complexity.
- Engineer microservices to enhance system functionality, leading to heightened scalability and improved performance capabilities.
- Implemented a front-end caching system using service workers, enhancing application performance by 50% and establishing more efficient metrics.
- Integrate applications seamlessly with the Xero accounting system to streamline financial management processes.
- Enhanced software performance by 200% through the implementation of Laravel best practices after reviewing project code.

Project Manager & Senior Software Engineer – 01/2015 to 07/2023
Badinan Soft, Duhok, Iraq
- Boosted team productivity by 70% by leading the adoption of Agile methodologies and establishing structured code review processes.
- Effectively designed and delivered over 20 intricate systems, highlighting versatility in roles as both a Project Manager and Software Developer.
- Led a diverse multinational team of 7 developers, fostering collaboration across cultures and ensuring seamless project execution.
- Demonstrated exceptional expertise through the flawless execution of system migrations, seamlessly transferring over 100,000 records within a 15-minute timeframe without disruption.
- Directed a team of six developers to deliver two SaaS products in 10 months, transitioning from mobile-focused to multi-level platforms.
- In one year, I improved the skills of seven developers by 80% in clean code and software performance through code reviews and weekly guidance.
- Handled the complete lifecycle of SaaS applications, from development to marketing.
- Collaborated with customers to gather requirements, analyze project timelines and costs, and ensure timely delivery of applications.
- Lead and oversee team meetings while effectively managing stakeholder interactions.
- Reduce project costs by 50% by enlisting developers from multinational corporations and implementing remote work arrangements.
