Experience

Full-Stack Developer – Usofts, Erbil / Jan 2023 – Jan 2024

Html, CSS, bootstrap, JS, Vue.js, Node.js, Jquery, Ajax, php, Laravel, React, Google console, Google analytics
I worked as a Full-Stack Developer in Usofts, designing and implementing websites and systems with admin panel

- I am using for the front-end React framework and best standards in designing website such as performance, accessibility, best practice and SEO.
- I am using for the back-end Laravel framework, MVC, function with less time complexity and implementing security, Auth, Moderator, ORM and CRUDS operation in addition to optimized and cleaned joining query table.
- I am using Google search console for increasing the website Google search through adding robot files and using the best keyword and descriptions for the site.
- Using Google analytics and Google tag manager to navigate all the internal activities of the visitors on the site
- Generating client reports outlining and summarizing all website activities and traffic.

Social Media Specialist – SPF, Erbil / Aug 2022 - Jan 2023

As a social media specialist, I was responsible for these tasks:

- creating and designing social media posts, additionally developing and maintaining SPF website performance
- Designing motion graphics videos using Photoshop, illustrator, and After Effects
- designing and presenting lectures on how to protect personal information and raising awareness about electronic blackmail

Technical Support Specialist – Watana (ISP), Erbil / Aug 2022 - Jan2023

I played a pivotal role in ensuring the seamless operation of our network infrastructure by configuring, managing, troubleshooting, and monitoring a wide range of network devices, including MikroTik, Cisco, and Ubnt hardware.

- Proficiently configured and managed servers to maintain optimal performance and reliability, ensuring uninterrupted business operations.
- Implemented and maintained best practices for server security, data backup, and disaster recovery.
- Quickly identified and resolved complex technical issues related to servers and network devices, minimizing downtime and ensuring minimal impact on operations.

- Provided live technical support for agents, offering remote assistance to access client computers and servers to diagnose and rectify issues promptly.
- Implemented robust network monitoring solutions to proactively identify and address performance bottlenecks and security threats.

IT Officer– UPP, Erbil / Oct 2021 - Aug 2022
The main duties and responsibilities include:

- Data Analysis and Interpretation: Design analysis methodology, conduct descriptive analysis, interpret complex data sets, and innovate new products, tailoring outputs for diverse audiences.
- Software Development and Maintenance: Collaborated with cross-functional teams to gather requirements and design customized software solutions to streamline business processes.
- Visualization: Bring data to life using static and interactive visualizations and maps, communicating insights with clarity and creativity.
- Oversee the installation, and maintenance of hardware components such as workstations, laptops, and mobile devices. Manage software licenses and updates.
- Provide training and guidance to staff on IT best practices, security protocols, and the use of specific software applications or systems.
