Summary
I studied Computer Engineering at Selçuk University. Before graduation I worked at two different part time jobs. After graduation I started to work as Software Engineer for Digiturk (beIN Media). Then I was promoted to the title of Software Development Coordinator by beIN Media. I worked on a number of large software projects at broad spectrum. I have more than ten years of work experience at Information Technologies industry.

Skills
· Excellent command of ASP.NET, .NET Core, EntityFramework, C#, MSSQL, PL/SQL, T-SQL, Angular, jQuery
· Excellent command of WindowsFormsApps, DevExpress, operating systems, threads, processes, file systems
· Strong knowledge of software architecture, design patterns, database modeling, ORM, SOA and web security
· Strong knowledge of AWS, SQS, S3, EC2, ElasticBeanstalk, Redis, ElasticSearch, Kibana, Git, OpenShift, TFS
· Strong knowledge of Apache NiFi, Jolt Transform, MongoDB, MassTransit, RabbitMQ, Docker, Linux, PostgreSQL
· Good knowledge of Java, Delphi, PHP, Oracle, MySQL, Nodejs, C, C++, cross platform compiling/running
· Fluent English Speaker, Native Turkish Speaker, Native Kurdish Speaker, Beginner German Speaker

Education
2002 - 2009 : Selçuk University; Bachelor's Degree in Computer Engineering
1998 - 2001 : Cumhuriyet Science High School
1994 - 1998 : Kızıltepe Anatholian High School

Boyner Group – Senior Software Engineer, December 2020 - Present Istanbul
· Developing RESTful APIs and MVC applications using .NET Core, MongoDB, RabbitMQ, MSSQL.

Infinidium Technologies – Senior Software Engineer, February 2020 - December 2020 Istanbul
· Developed RESTful APIs and MVC applications using .NET Core and Oracle in microservice architecture.

beIN Media Turkey – Software Development Coordinator, November 2011 - February 2020 Istanbul
· Used WCF, MVC, WebAPI, jQuery, Angular, Bootstrap, HbbTv, JSON on back/front end development.
· Developed and maintained new web applications which plays live streaming or vod contents.
· Developed applications/services which parse XML data received by http/ftp push and write to database.
· Designed and optimized relational database tables and developed stored procedures, functions, views.
· Developed various web/windows applications which manage render engines such as vizrt, orad.
· Used Kanban/Scrum as Agile methods with Jira, Bitbucket, Bamboo tools on continuous integration processes.
· Planned development time; created analysis, quality and performance documents of projects using Confluence.
· Managed the development tasks sharing with team and recruited new staff to software development team.
· Developed/maintained/led Digiturk web applications and RESTful APIs in microservice architecture.

I-Cat Information Technologies – Software Engineer, June 2009 - July 2010 Ankara
· Developed an ERP web application using ASP.NET and Oracle.
· Developed new modules with web forms and stored procedures using C# and PL/SQL.

No Professional Works
· Developed various applications which manage render engine graphics of tv programs using MSSQL and .NET.
· Developed check reading machine OCR automation using Twain library, Oracle and .NET.
· Web security researcher/pentester using Burp Suite, Kali Linux, Nmap, Sublist3r, sqlmap, acunetix
· Apple development (Swift on XCode)

Courses
· November 2017 - Amazon Web Services - 3 days - beIN Media Digiturk
· January 2017 - MultiDRM - 1 day - beIN Media Digiturk
· December 2016 - Android Programming - 1 day - beIN Media Digiturk

Hobbies: Swimming, chess, participating technical meetups
