EXPERIENCE

Teach Team Leader - Software Developer

ISH7NHA • Full-time • Saudi Arabia

(09/2022 – present)

In this journey, I fully worked on the (ish7nha.com) app and lead the team there and dealt with more than a million data.

Built and maintained many Backend solutions, such as

- Maintained & Added a lot of features to the project.

- Created a third-party app that is linked with Salla App for merchants to sell Digital cards.

- Implementing a way to export a million data from database.

- Helping developers to Implementing tasks in the best way.

- Implementing many of payments methods such as (Noon payment, Apple pay, Stc Pay, Mada pay).

- Integration with many third party services such as SMS, Email, Onelink, etc

- Implementing infrastructure dependent completely on Forge.com.

Senior Backend Developer

Gateway (Fastlink) • Full-time • Iraq (Erbil)

(11/2021 – 08/2022)

I worked there as Backend Developer with Agile methodology, and I did refactor a lot of legacy code, helped with some ideas to create a one-way style to write the code to make the PRS easy to read and review, then create a package for making our work easy with upcoming projects.

FullStack Developer

Tech Chances For IT • Full-time • Saudi Arabia

(08/2020 – 09/2021)

In this journey, I fully worked on the (**wtheq.sa**) app and faced a lot of challenges with the team.

Built and maintained many solutions, such as:

- Create a way to convert the normal text to a PDF contract that can be verified by the KSA government.

- Create a service for companies to make their own contracts.

- Implement fully responsive dashboards.

- Followed some best practices such as SOLID.

- Implemented many design patterns such as Facade and Singleton.

- Implementing infrastructure dependent completely on AWS.

Backend Developer

Salla • Full-time • Saudi Arabia

(05/2019 – 07/2020)

I worked there as a Technical Support Developer, and it was one of the most wonderful places where I worked as a debugger for the company's code and fixed the most important problems and errors contained in the project, and also provided some solutions, and dealt with a large amount of data of products and requests.

Software Developer

BandTech • Full-time • Iraq

(04/2017 – 05-2019)

Participated in building multiple projects which mainly digitize existing services that have been manual.

Built and maintained many backend solutions, such as

- Constructed architecture for newly created projects and implemented them.
- Built a backend layer that abstracts and encapsulates communicating with a legacy system.
- Built a backend package that is used to facilitate communication between internal microservices.
- Implemented search functionality with caching and indexing for better performance.
- Maintained closely complex backend services.
- Made multiple services to be used as external APIs for third parties.
- Followed some best practices such as SOLID and CQRS;
- Implemented many design patterns such as Builder, Factory, Mediator, Proxy, Command, Facade, State, and Singleton.
- Implementing infrastructure dependent completely on AWS.

FullStack Developer

Freelance • Full-time

(01/2015 – 03/2017)

In this fun journey I accomplished a lot of things from, I used Laravel framework for web, Tailwind CSS framework for design, then writing features and unit testing was one of my priorities, dealt with API in aprofessional way for backend, then plunged into the world of e-commerce, creating several eCommerces now available online, as well as my journey in dealing with AWS, Heroku, Namecheap, and Ocean Digital as server providers in most of my projects

SKILLS

Software Engineering

- Requirements Engineering
- Software Design
- CI/CD

- Design Patterns
- Software Architecture
- Containerization

Web Development & Programming Languages

- GoLang
- RESTful & GraphQL
- SQL & NoSQL
- PHP/Laravel
- Docker

- Vue
- PWA
- JavaScript/Nodejs
- Web Sockets
- Caching

- TypeScript
- Git
- Redis
- HTML5/CSS3
- Tailwindcss

EDUCATION

Cihan University - Duhok

College of languages - English department (09/2018 - 5/2022)

LANGUAGES

Kurdish, Arabic, English	**Advanced**
Turkish	**Basic**

CERTIFICATES

Full-stack web development certificate (10/2017 - 11/2017)

Institute of Electrical and Electronics Engineers

Covers HTML5, CSS3, JavaScript, Bootstrap,DOM Manipulation, jQuery, Laravel, MYSQL, REST, MongoDB, PassportJS.

Backend Developer (4/2020 - 5/2020)

Udacity

Covers Docker, Dockerfiles, Compose, learning and using containers end-to-end, from development, testing with Golang.

VOLUNTEERING

- I love volunteer work and have participated in initiatives and organizations such as "Code for Iraq" for more than three years and up to this moment and until now I got two certificates from IEEE Certificates Program"

- I like to help people to find their way to programming, and I do some courses on my YouTube channel under the name (Rabeea Ali) and also write articles.
